The Art of Agile

Yes, fun is mandatory when you learn!

Join us for a fully interactive, hands on workshop where teams experience the pain of siloed working when trying to create a product together. Imagine being part of a project where everyone has their own tasks but needs to collaborate seamlessly to succeed. That's what we'll explore in a practical, hands-on way, showing you the power of effective teamwork and agile principles.

This workshop is ideal whether you're new to agile or have some prior knowledge. It's a fantastic opportunity for student groups, clubs, or friends to come together and learn how to efficiently collaborate on projects. We've successfully conducted this session with groups as large as 400, demonstrating its scalability and effectiveness. Here, you'll experience real-world scenarios that will enhance your understanding of teamwork and agile practices.

As a bonus, all participants can get access to the pack and facilitation notes, enabling you to share and implement what you've learned in your own environments. b This workshop will be an insightful journey into the world of agile, where you'll develop practical skills and understand the significance of collaboration and adaptability in any team setting.

Murder on the Beach: Who Killed the Product Owner?

An immersive and interactive workshop that combines agile techniques with crime-solving excitement. Engage in a collaborative and competitive experience as you work in teams to unravel the murder mystery surrounding the unfortunate demise of the Product Owner. We promise a fun-filled session, where we will take on the roles of agile practitioners, including Product Owners, Business Sponsors, and Business Analysts, to investigate the crime scene using Agile techniques. The workshop is designed to be highly immersive, allowing you to apply agile principles

In a murder mystery scenario, deciphering clues, collaborating with team members, and iterating towards solving the captivating mystery. This highly collaborative experience encourages teamwork, effective communication, and quick thinking, all essential elements of successful Agile projects.

With a competitive twist, prizes await the most adept and agile detectives who successfully solve the crime. Join us for an unforgettable blend of learning, camaraderie, and entertainment at the intersection of Agile and crime-solving. Get ready to uncover the truth and claim your victory!
